1st International Interdisciplinary Conference

“Economy, Society and Climate Change – The impact of mega trends in the Built Environment, Construction Industry and Real Estate”

7-10 November 2018

The Technical Chamber of Greece in cooperation with the International Organizations **FIG** – International Federation of Surveyors, **UNECE WPLA** - United Nations Economic Commission for Europe Working Party on Land Administration, **UIA** – International Union of Architects and **ECCE** – European Council of Civil Engineers will co organize the 1st International Interdisciplinary Conference **“Economy, Society and Climate Change – The impact of mega trends in the Built Environment, Construction Industry and Real Estate”**, 7-10 November 2018 at the Eugenides Foundation, 387 Syggrou Av., Athens, Greece (www.tufe2018.com).

In this Conference architects, civil engineers, surveyors, representatives from International Bodies and Organizations, governmental scientific advisors, policy makers, senior experts, CEOs’ and academia will bring together professional experiences and scientific knowledge in the fields of economy, society and climate change, in the scope of protecting the environment and the humanity and to facilitate the digital transition in construction industry. Trends in the management of land and real estate, heritage preservation, property valuation and taxation, sustainable and renewable energy sources, standardization of BIM (Building Information Modeling), environmental friendly and disaster management tools, funding issues, as well as educational and professional aspects will be presented.

For the first time, the Technical Chamber of Greece is co organizing a Conference with the collaboration of 4 International Entities, while Presidents from the International Organizations **FIEC**- European Construction Industry Federation, **EFCA** – European Federation of Engineering Consultancy Associations, **EAMC** - Engineering Association of Mediterranean Countries, **ACE** – Architects’ Council of Europe και **CLGE** – Council of European Geodetic Surveyors have been invited to participate and address speeches.

The aim of the conference is to mark the beginning of a long-term cooperation between European and International professional and scientific bodies of Engineers, to enhance dialogue, to exchange ideas in line with modern trends in the construction industry, real estate and digital technologies and to present the status of Building Information Modeling on European countries.

Until now more than 40 International speakers have confirmed their participation and participants from all over the world have already registered.
