

ECCE Standing Committee Knowledge and Technology

Meeting on Friday, 28th October, 2011

Antalya, Turkey

Introductory Report

BACKGROUND

- There is a high **challenge of change** for building and civil engineering during this decade
- **New knowledge and technology** has to be adopted **from R&D results into practice**
- The key question is, **how the working of SC K&T can be developed for this challenge?**

Change of the Paradigm of SC K&T

Transform the work of **SC K&T**

- *from a minor discussion club of a few persons*
- *into an active and common platform and interactive audience of all ECCE members who are interested in actual themes*
- for **supporting the change** of the paradigm of building and civil engineering in this decade.

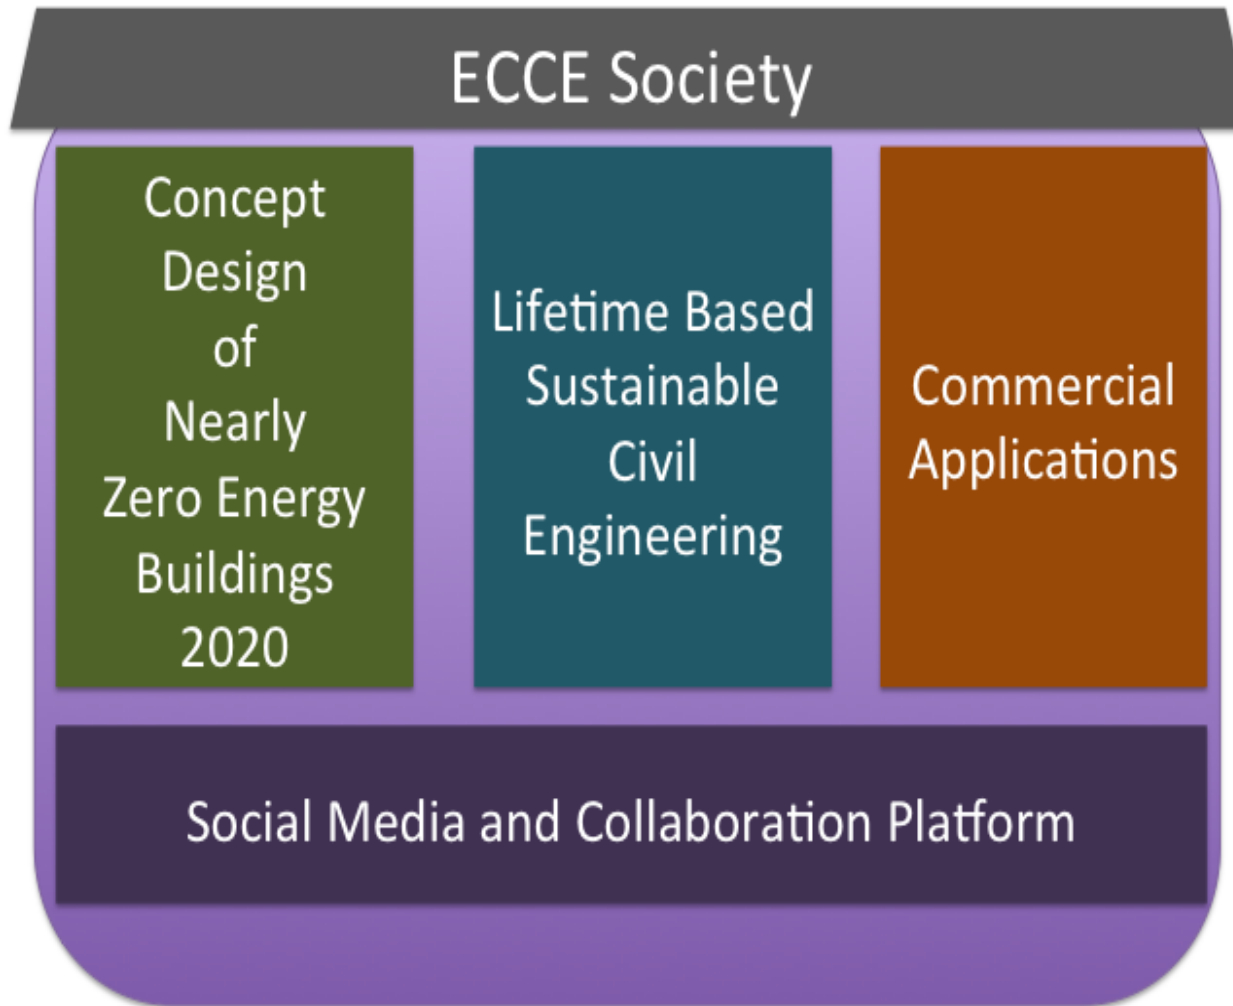

“ECCE Social Network BuildLife” is a modern tool for **drastic advance of the work of ECCE SC K&T**

ECCE Social Network is also **a part of the generic Global BuildLife Network**

Social Networking means

- real time communication and **interactive building of understanding**
- with the help of information technology, while
- the **partners are able to act both as consumer (user) and as producer.**

Four Key Services at the first phase

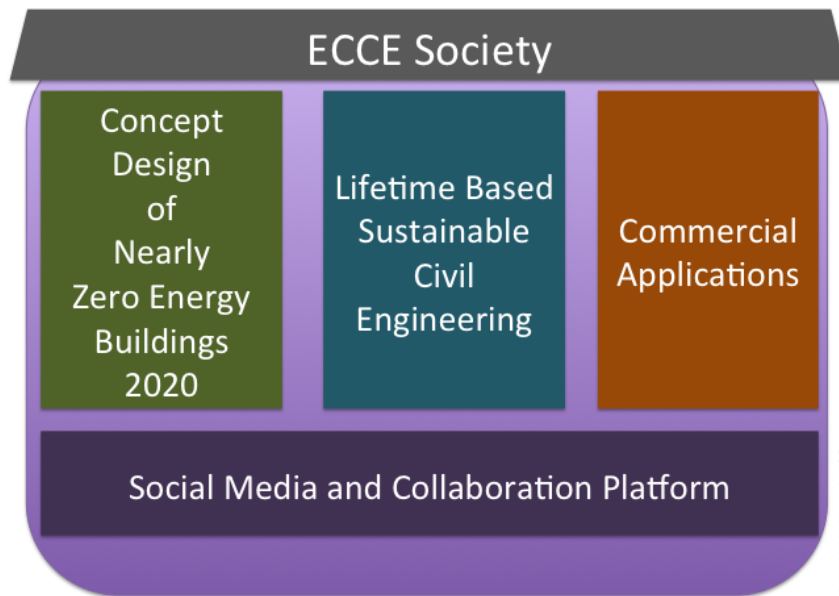

AGENDA

- **Vice Chairmanship** of SC K&T. Proposal for election of Mr. Ruben Paul Borg as Vice Chairman of SC K&T
- **Renewal of the paradigm of SC K&T taking into use the ECCE Social Network “BuildLife”**, including sections for:
 - Zero Energy Buildings 2020
 - Lifetime Engineering
 - European technology Development
 - General information and discussion circles for ECCE organisation and National Associations
- **Social Networking** means communication and interactive building of understanding with the help of information technology, while the partners are able to act both as consumer (user) and as producer.
- **ECCE event** (Conference or Seminar) with the theme: **"Lifetime oriented Building and Civil Engineering"**

WELCOME!

to discuss on the actual issues for developing the activities of SC K&T

BuildLife creates a service eco-system
